Section 1

Introduction

Congratulations on your purchase of the 8-Port 10/100Mbps Ethernet Switch. This switch integrates 100Mbps Fast Ethernet and 10Mbps Ethernet network capabilities in a sleek and slim package.

Before you begin, please verify that you have all the parts listed in the Package Contents.

Section 2

Connecting the Switch

The 8 UTP/STP ports of the switch support automatic MDI/MDIX crossover detection, which allows for true "plug-and-play" capability. With the Auto-MDI function, you can simply plug in an Ethernet cable into the switch without worrying about if the other end of the cable is connected to a network adapter or to another switch or hub.

Powering on the switch is as easy as plugging in the AC Power Adapter to the power port of the switch.

The 8-port switch has built-in LED indicators:

Power: Solid green indicates the switch is receiving power.

Link/ACT: Solid green indicates the port is connected to a station. Blinking green indicates the port is sending/receiving data over the network.
